   Christopher Roper in his article in your February edition (PointX and
the future of Geographic Information) made several valid points about the
needs for Points of Interest information and the implications for both data
and...

...fact, this was first recognised in the late 1960s and 70s.
      Secondly, Christopher goes on to imply that standards may be
required, and then that PointX is not seeking to establish a standard.
This seems to be confusing but is it also contradictory, as the PointX
web site says:
      "Question: How are the data supplied? Answer: The data come in an
industry standard ASCII delimited file format on CD. Future planned...

...will comply with BS7666 Part 3 the British Standard for addresses, The
size of the compressed data file for Great Britain is approximately 150Mb."
      Is PointX going to comply with BS7666 and, if so, when?
      Yours sincerely,
      A K Black
      Operations Director, Intelligent Addressing Ltd, London, UK

Emergency services pinpointed.(LBS News in Brief)(PointX Ltd.)(Brief Article)

Text:

   The precise locations of every police, fire and ambulance station, over
5000 in all, are now available from PointX (Exeter, England), which
claims to have Britain's most comprehensive spatially referenced database
of points of interest. The database now has over 3 million features...

...to the public sector as well as to mobile phone and internet services.
Local authorities in Nottingham and Lancashire, and The Countryside Agency
are using PointX to improve services to the citizen and to identify
accessibility to corner shops, post offices and village stores, especially
in rural areas. PointX plan to include cash machines, bus stops and bird
sanctuaries in the next few months.

 M2 PRESSWIRE-12 September 2003-m-spatial: m-spatial partners with Ordnance
Survey, TeleAtlas and PointX for MapWay "made to measure" mapping for
mobile phones; Unique UK database features over 20 million buildings and
points of interest(C)1994-2003 M2...

RDATE:09122003
London: m-spatial will announce at GeoSolutions 2003 that the UK's foremost geographic data suppliers - Ordnance Survey, TeleAtlas and PointX - are providing the source data for its MapWay "made to measure" mobile mapping solution recently launched on Vodafone live! and O2 Active.
By combining these...

...product enables MapWay to access a database of over 20 million buildings - from major landmarks to individual houses - to provide address information and building outlines
- PointX : a comprehensive current dataset of over 3 million points of interest - from police stations to petrol stations
- TeleAtlas: detailed streetplans of over 30,000 cities...

...This is a great example of an innovative use of our mapping data providing value added services for the wireless devices of today and tomorrow."
PointX 's General Manger, Phil Alder said: "MapWay is precisely the kind of ground breaking application that was envisaged when our comprehensive points of interest database...

...country, from which it produces and markets a wide range of digital map data and paper maps for business, leisure, educational and administrative use.
About PointX
PointX is a joint venture company set up to develop and market a 'points of interest' (POI) database containing more than 3 million features covering Great Britain. Its vision is to lead the POI market by delivering the most comprehensive, current and consistent national data. PointX has two investors: Ordnance Survey and Landmark Information Group. PointX 's registered office is located in Sowton, Exeter.
About Tele Atlas
Tele Atlas is the worldwide leader in the development of state-of-the-art...

PointX and the future of geographic information: Christopher Roper outlines a venture that promises to change the face of mapping as we know it. (Futures).

...surrounding POI, Ordnance Survey advertised for a partner via the Official Journal of the European communities and eventually teamed with Landmark Information Group to form PointX Ltd. The joint venture released the first cut of a national POI data base covering the whole of mainland Britain in mid-2002.
PointX had to find its own way in building a classification system that could handle businesses, natural features such as country parks and objects such as...

...could begin, this extended the lead-time between discussing the concept with potential users and delivering data.
3G impetus
A major impetus for building the PointX data base was provided by telecom providers straining at the leash to build 3G networks that had already cost them (pounds sterling)20 billion in...

...real location-based services. they need to not only know where they are, but offer instant access to high-quality information about the neighbourhood. The PointX data base, with over three million points of interest, can be stored on a single CD, This may appear a massive amount of data to store in a mobile phone by today's standard, but for how long?
Sea change
PointX may be a foretaste of a sea change in the way we think about geographic information.
For example, the large-scale OS map has traditionally...
...to the new ways in which people are collecting and using spatial information. Arguments about standards can, all too easily, become an end

in themselves.
        PointX does not seek to establish a standard, but rather to
provide data in a useful form for new users of GI. New hardware, new
applications...

...a slow and painful process, but all involved are convinced that it will
change the face of GIS.
        Christopher Roper is chairman of Southampton-based PointX Ltd

m spatial: m spatial partners with Ordnance Survey, TeleAtlas and PointX for MapWay "made to measure" mapping for mobile phones; Unique UK database features over 20 million buildings and points of interest

-

London: m-spatial will announce at GeoSolutions 2003 that the UK's
foremost geographic data suppliers - Ordnance Survey, TeleAtlas and
PointX - are providing the source data for its MapWay "made to measure"
mobile mapping solution recently launched on Vodafone live! and O2 Active.
    By combining these...

...product enables MapWay to access a database of over 20 million
buildings - from major landmarks to individual houses - to provide address
information and building outlines
    - PointX : a comprehensive current dataset of over 3 million points
of interest - from police stations to petrol stations
    - TeleAtlas: detailed streetplans of over 30,000 cities...

...This is a great example of an innovative use of our mapping data
providing value added services for the wireless devices of today and
tomorrow."
    PointX 's General Manger, Phil Alder said: "MapWay is precisely the
kind of ground breaking application that was envisaged when our
comprehensive points of interest database...

...country, from which it produces and markets a wide range of digital map
data and paper maps for business, leisure, educational and administrative
use.
    About PointX
    PointX is a joint venture company set up to develop and market a
'points of interest' (POI) database containing more than 3 million
features covering Great Britain. Its vision is to lead the POI market by
delivering the most comprehensive, current and consistent national data.
PointX has two investors: Ordnance Survey and Landmark Information Group.
 PointX 's registered office is located in Sowton, Exeter.
    About Tele Atlas
    Tele Atlas is the worldwide leader in the development of
state-of-the-art...
